

# Clearshield Cover™

The Clearshield Cover™ features a clearcoat surface on the film. This superior component of the Clearshield Cover™ offers three main benefits:

**DURABILITY:** Self-healing properties offer high resistance to scratches and damage, helps reduce the appearance of fingerprints and will extend the life of your device.

**COVERAGE:** Greater pliability and flexibility allows the Clearshield Cover™ design to cover the corners and curves of your device.

**DROP RESISTANT:** Improved grip makes it easier to hang on to your device.

The Clearshield Cover™ does not alter the function or sensitivity of touch screens, and because the protective film is optically clear, it will not distort the images on the interface. Optimal touch screen sensitivity will be achieved after the 12 to 24 hour curing period.

Some cosmetic imperfections, often referred to as “disturbed adhesive”, are unavoidable and may make themselves evident as a result of the installation technique necessary to apply the film.

***We recommend waiting 12 to 24 hours after installation of the Clearshield Cover™ to turn your device back on and/or install the battery; this time allows the Clearshield Cover™ to “set up” properly and allow any solution under the film to dry. Also, since solution is applied on the Clearshield Cover™ during the installation process, this allows the electronic device enough time to properly dry. Our liability is solely for the Clearshield Cover™ and does not extend to electronic devices.***

**Time to Turn On Device:** \_\_\_\_\_

## **Clearshield Cover™ Maintenance**

Clearshield Cover™ requires simple maintenance and care in order to maintain its glossy protective finish, overall look and performance.

Application of non dye automotive wax/sealants maintain the finish.

Light film scratches: use a dab of Meguiar's #6 Cleaner Wax with a microfiber towel to remove surface scuffs and polish the film. Finish will an application of automotive sealant.
